

MT HOREB AREA COMMUNITY GARDEN PROJECT
A COMMUNITY SURVEY

For nearly a year, a group of community members have been planning for the possibility of starting a small, well-organized community garden in Mt Horeb. The committee is engaged in locating an optimal site, which includes the availability of water via fire hydrant or well, level ground and parking as necessities.

We would very much appreciate your input to assist the Mount Horeb Area Community Garden (MHACG) committee to assess need, your support, and ideas, and to help shape the project:

1)Do you think you and/or your family would be interested in having a garden plot at MHACG? YES or NO

2)Would you be interested in being involved in the planning process for the MHACG? YES or NO

3)Would you be interested in supporting this project in other ways? If so, what are your skills and how could you help? (There are many possibilities: a few hours of physical labor, financial support, publicity work, education, etc.):

4)Do you have, or know of, property for use or lease that might work for the MHACG?

5)Do you have any further comments or concerns?

Please write your name and contact information:

Thank you for taking the time to participate in this survey, and helping to guide our project. We look forward to a productive, creative and successful community garden.

The MHACG Committee
